

Modus Advanced, Inc. is a diversified company which helps take Original Equipment Manufacturers from Idea to Ignition by converting high performance materials into finished products.

## SOLVING CHALLENGING ENGINEERING ISSUES WITH:

-  EMI SHIELDING
-  DIE CUT GASKETS
-  MICROWAVE ABSORBERS
-  NOISE VIBRATION AND HARSHNESS
-  CUSTOM MOLDED RUBBER
-  THERMAL INTERFACE MATERIALS

## HOW MODUS™ HELPS:

- We meet aggressive deadlines by having experienced New Product Introduction (NPI) Teams in place; stringent, proven quick-turn gasket manufacturing processes; and access to a comprehensive material inventory, such as thermal interface and EMI shielding.
- We reduce total landed cost with a time-tested 4-step Idea to Ignition™ product realization process, aligned with the Modus™ vision of being the OBVIOUS CHOICE.
- We reduce risk by being the single source manufacturer when converting from prototype to production, including supporting builds in both the USA and China.

## HOW MODUS™ SUCCEEDS:

- We have complete access to thousands of materials which enable NPI Teams to meet aggressive deadlines.
- We have eleven in-house manufacturing processes, providing reliable vertically-integrated manufacturing versus a multi-source supply chain.
- We hold an overall on-time delivery record of more than 99%.
- We achieve a quality rating better than 99%.
- We deliver rapid domestic and overseas prototype and production.
- We provide solutions to save time and money by leveraging our multiple vertically integrated processes.
