Modus Advanced, Inc. Surface Wave Absorber is a thin, very highly loaded material, having high loss at microwave frequencies, while maintaining the desirable characteristics of elastomeric binders. Surface Wave Absorbers are the most heavily magnetically loaded absorber, designed to exhibit the highest loss, and intended to be applied to metal surfaces for traveling or surface wave attenuation.

The standard elastomer for this product series is silicone. Other elastomer formulations are available which may be better suited for specific environmental conditions.

**APPLICATIONS**
- Traveling or Creeping surface wave absorption
- Resonant Cavity Attenuation
- EM Reduction
- Mounted to an IC on a PCB
- Mounted directly on a micro-strip
- High Frequency Interference
- Inside a shielding can

**FEATURES AND BENEFITS**
- Tough material can survive outdoor exposure
- Very thin for compact locations
- Flexible elastomeric material will not crack
- Support broad frequency range
- RoHS Compliant
- Halogen Free

**TYPICAL PROPERTIES**
- Sheet Size: 24" x 24"
- Color: Dark Grey
- Elastomer: Silicone
- Operating Temperature: -60°F to 375°F
- Flame Rating: UL94-V0
- Hardness: Shore A 60-80

**AVAILABILITY**
- Without adhesive - Part # AB340-0070
- With adhesive - Part # AB340-0070-AD
  - Sheets, Die Cut, Kiss Cut Pads

**ABOUT MODUS**
We are Modus! With multiple locations in North America and China, Modus Advanced, Inc. is a diversified custom manufacturer which converts EMI Shielding, Environmental Gasket Materials, Microwave Absorbers, Acoustic Materials, Thermal Interface Materials and other high performance materials into finished parts. Modus utilizes its 40 years as an established provider of high quality, reliable products to create precisely what customers specify. Innovative processes; custom fabrication utilizing performance materials; an on time delivery record of more than 99% means Modus is well positioned to help your company succeed.
