

MANUFACTURING CAPABILITIES

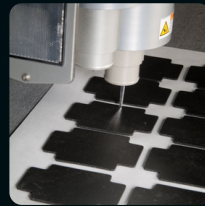

SigShield

- ◆ Includes manufacturing of metal housing, form-in-place gasket dispensing, plating, as well as addition of thermal materials, and RF absorbers.
- ◆ Turnkey custom RF shields in half the typical lead time.

Die Cutting

- ◆ Best value
- ◆ High volume

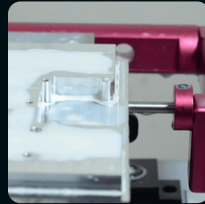

CNC Cutting

- ◆ Rapid prototype production
- ◆ Good for tight tolerances

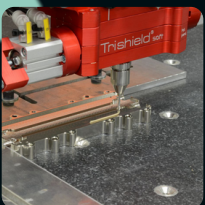

Waterjet Cutting

- ◆ Thicker materials
- ◆ Good for tight tolerances

Machining

- ◆ HMC, VMC, and 5-Axis
- ◆ Prototype and production volumes

FIP Dispensing

- ◆ Small, intricate gaskets
- ◆ Environmental and EMI gaskets

Laminating

- ◆ Apply no-bubble PSA
- ◆ Bond multiple materials together

Slitting

- ◆ Custom-cut widths
- ◆ High volume rolls of materials

Molding

- ◆ Small or large parts
- ◆ Prototype and production volumes

QUALITY + COMPLIANCE you can trust

✓ AS9100

✓ ITAR

✓ ISO 9001

✓ CMMC Level 3

The **MATERIALS** you need across the **APPLICATIONS** you build solutions for

Gasket Materials

- Form-In-Place Gaskets
- Rubber (sheet & roll)
- Sponge Materials
- Foam Materials

- EMI Shielding Materials
- Thermal Interface Materials
- Sound Dampening Materials
- Electrical Insulation Films
- CNC Machined Metals
- Vibration Isolation

We can work with **1,000s** of materials, and we have strategically built partnerships with industry leaders to **deliver on your designs faster and with reduced costs.**

Speak to an **ENGINEER** today.

We strive to get every quote turned around in **24 hours or less.** Send us your design or project to get an estimate.
