Modus Advanced, Inc.'s WesCoustic™ Perforated Vinyl Faced Foams combine the absorption properties of acoustical foam with the toughness and durability of vinyl. Our flexible polyurethane open cell foams are manufactured to optimize pore size, air flow resistance and density. The perforation pattern has been engineered to provide maximum absorption and resilience. The attractive leather-like appearance makes it ideal for cab interiors, and enclosures. This material can be fabricated to customer specifications. This foam meets MVSS 302 for flammability.

**FEATURES AND BENEFITS**
- Durable perforated vinyl face
- Maximum absorption and resilience
- Optimal pore size, air flow resistance and density

**BARRIER / ADHESIVE**
- Barrier Material - Yes
- Pressure Sensitive Adhesive (PSA) - Yes

**APPLICATION**
The primary method of application is utilizing a Pressure Sensitive Adhesive (PSA) backing and/or mechanical fasteners.

**CUSTOMERS ALSO SEARCHED:**
- Absorption Coefficient
- Coefficient
- ASTM C384
- PUR
- Gaskets
- Urethane foam
- Cellular urethane
- Low outgassing
- UL 94 HB foam
- Die cut foam
- Noise reduction
- Acoustical foam
- Foam kit
- Water jet foam
- Cab insulation
- Sound damping
- Sound absorbing
- Soundproof foam
- Metamine foam
- Barrier foam
- Acoustic foam

**DATASHEET**

**WESCOUSTIC™ ACOUSTICAL FOAM**
**PERFORATED VINYL FACED FOAM**

**PART #: SP250-0984    THICKNESS: 0.5”**

Modus Advanced, Inc.'s WesCoustic™ Perforated Vinyl Faced Foams combine the absorption properties of acoustical foam with the toughness and durability of vinyl. Our flexible polyurethane open cell foams are manufactured to optimize pore size, air flow resistance and density. The perforation pattern has been engineered to provide maximum absorption and resilience. The attractive leather-like appearance makes it ideal for cab interiors, and enclosures. This material can be fabricated to customer specifications. This foam meets MVSS 302 for flammability.
